Catch Seafood is pleased to offer a variety of gluten reduced options on our menu. We are not a Gluten-Free Restaurant and cannot ensure that cross contamination will never occur. We have processes in place to minimise the risk. Products containing gluten are sometimes fried in both our beef dripping fryers & our vegetable oil fryers, meaning there is a definite risk of cross contamination. If you are a coeliac or highly sensitive to gluten or gluten based products please advise a member of our team and we will do our best but cannot guarantee your order will not come into contact with gluten somewhere in the cooking process.
